WEATHERIZATION ASSISTANCE PROGRAM

NOW ACCEPTING APPLICATIONS!

Weatherization Program

The U.S. Department of Energy Weatherization Assistance Program reduces energy costs for low-income households by increasing the energy efficiency of their homes while ensuring their health and safety.

Free Home Energy Assessment

We provide expert suggestions for implementing energy-saving measures that are tailored to your specific household needs. Our services include analyzing your energy utility bill and inspecting your energy equipment to identify any potential health and safety risks. Please note that all applicants are subject to approval before scheduling a home assessment.

Free Energy Efficient Replacements

The weatherization program will install energy-efficient devices and appliances such as solar water heating systems, high-efficiency showerheads, aerators, advanced power strips, and energy-efficient refrigerators. The replacements will be determined based on the home energy assessment needs and program availability.
